			<b>1794 Keimirči II.</b>	<b>927 Fasel</b> <b>1531 Kaachka</b>

**Al-Džaira was born on the 1 June 2008. She is the bay filly. From the father's side she has very good and strong legs, she has also expectations for the endurance or for the racing. Al-Džaira has very good character and she is also very fast. She is the typical Akhal-tekkiner filly with very good exterior and movement.**

Her father **1185 Džasman** is was born in Dagestan and belongs to the **Gelishikli line**. In his pedigree is very close inbreeding to the stallion **870 Garem** (II x II). The father of Džasman was the gold buckskin stallion **1115 Jasman 9**. Jasman was one of the best horses from Vladimir Shamborant Stud-farm. Jasman dies early and left after himself only one yearclass and only two stallions – Džasman and his brother Jaz-Jar. As the breeding stallion is 1185 Džasman available to the European breeders. Džasman was classified as the Elite II.

Her mother **Al-Kaira** belongs from the father's side to the Fakirpelvan line. Great grandfather of Al-Kaira, stallion 973 Abdurachman was born in Dagestan and had very good results in racing. The same was the great grand-mother Selbiniaz – she was classified as Elite I. and she had very good results in racing too. The stallion Arslan was the record holder in show-jumping (192 cm). From the mother's side belongs Al-Kaira to the Ak Belek line. Ak Belek offspring have very correct exterior and typicality. The line Ak Belek is very rare. Al-Kaira was classified as Class I.

**The Price is on the request or for the highest offer.**
