Altia was born on the 22 May 2008. Probably she will be also grey colored. From the father's side she has very good and strong legs, she has also expectations for the show-jumping or for the dressage. Altia have very splendid movement and she is very good character, but also she has super exterior. She has the assumptions for the show and to be in Elite Akhal-Teke Classification.

Her father **1185 Džasman** is was born in Dagestan and belongs to the **Gelishikli line**. In his pedigree is very close inbreeding to the stallion **870 Garem** (II x II). The father of Džasman was the gold buckskin stallion **1115 Jasman 9**. Jasman was one of the best horses from Vladimir Shamborant Stud-farm. Jasman dies early and left after himself only one year-class and only two stallions – Džasman and his brother Jaz-Jar. As the breeding stallion is 1185 Džasman available to the European breeders. Džasman was classified as the Elite II.

The mother of Altia is **Alem**. Alem belongs to the **Sere line**. Sere line has the ground in the line **Sapar Chan**. The stallion **175 Melekuš** was the latest son of the legendary stallion Boinou and he is also his best offspring. The gold buckskin **919 Sere** was born in 1965 and he was the Champion of the Breed. His line is in the breeding very popular for the diligence and correctness of the physique. In the Alem's pedigree is any further one important stallion – the gold bay stallion **697 Gelishikli**. From the side of Akira has Alem the line Peren. **779 Peren** was born in Turkmenistan and he was classified as Elite. All things about Peren were rarely – ha was very good in racing, his sons Polotli and Kamar were the pride of Turkmenistan. In the breeding is very popular to cross this line with lines Kaplan, Kir Sakar and Karlavach. Alem has the class Elite I.

The Price is on the request or for the highest offer.
